

AMENDMENTS TO THE SPECIFICATION

Please amend the Substitute Specification at page 21, lines 10-14 as follows:

More specifically, in the first embodiment, the low frequency Hz(L) is set to ~~102Hz~~ 10^2 Hz. The electrostatic capacity C(L) is set to 33pF. The high frequency Hz(H) is set to ~~105Hz~~ 10^5 Hz. The electrostatic capacity C(H) is set to 25pF. Thus the value of the equation 1 is 2.7.
